DELIVERY METHODS AND ORGANIZATION METHODS

Instructor Led Training

Traditional courses in which both teaching and student participation take place physically at the client's premises or at Bittnet's premises.

Virtual Classroom

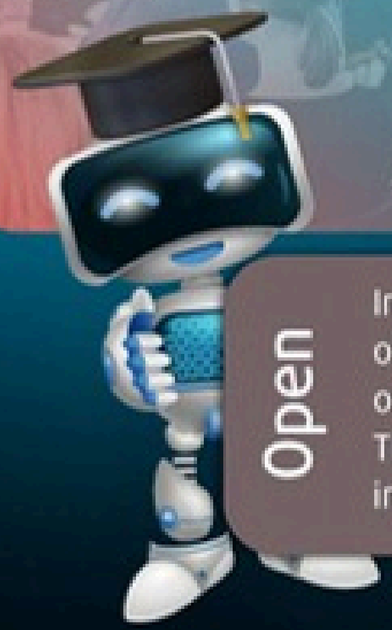
Participating in a virtual class requires live/remote connection regardless of where the course participants are. In this class, the teaching takes place live, with a trainer, the students have access to the same technical and learning resources like in the Instructor Led Training format.

Hybrid Classroom

It presupposes the physical presence of the students in the classroom with the instructor, with the modern teaching approach that is supplemented with a "live streaming" connection based on online, distance learning, in real time and simultaneously with the participants in the classroom.

Self-paced Training

Courses with access to study materials and going through them at your own pace.



Open

In Open courses, the minimum number of participants required for the organization is 8, maximum 16 people. The participants are diverse, working in several companies.

Closed

Closed classes can be organized both at the client's premises and at ours. The trainees participating in this group will be exclusively from one company, and the minimum number of participants is 8.

TESTIMONIALS

ING

"The Bittnet Training trainers left an excellent impression on me with their professionalism. The collaboration had a positive impact on our performance, managing to improve our skills and significantly develop our knowledge in our field of expertise."

PTW

"They do an excellent job, are always punctual and will go the extra mile for you. I am happy to recommend Bittnet Training services."

rinf.tech

"They shared their knowledge with us and taught us how to operate our AWS assets and increase their effectiveness and efficiency. Recommended Bittnet as a partner you can depend on and that can deliver quality services in the agreed time and costs."

888 HOLDINGS

"After several months of work, it seems that we have found the best partner for our technical needs in Bucharest. I came for the attitude and professional skills and I stayed for the quality of the services."
